

Name: Noemí Dorival-García

Degree	Awarding Institution	Topic/title
PhD	University of Granada, Spain	Analytical chemist
Master in Sciences	University of Granada, Spain	Analytical chemist
Technical degree	Pontificia Universidad Católica del Perú	Environmental Management
Bachelor's degree	Peruvian University Cayetano Heredia (Peru)	Chemist
Bachelor's degree	Peruvian University Cayetano Heredia (Peru)	Biologist

Current research:

“Facility of the future – the plastic factory, enabling single use technologies” (Spokes Biopharma Project)

Position	Company/institution	Key responsibilities
Postdoctoral researcher	The National Institute for Bioprocessing, Research and Training (Ireland)	Development of WP1 related to analytical approaches to E&L problem.
Postdoctoral researcher	University of Granada (Spain)	Development of analytical methods for determination of emerging contaminants in environmental matrices.
Assistant professor	Peruvian University Cayetano Heredia (Peru)	Teaching different subjects for undergraduate students of medicine and sciences specialties.

Research expertise keywords:

Analytical methods, environmental matrices, biological matrices, membrane bioreactors, extractables and leachables, single-use technologies.

Existing industry interaction to date - any secondments, placements, project work, etc.

Dynamic interaction with industry partners involved in the project.

Collaboration with Thermo-Fisher Scientific. Development of lab work in the facilities in the UK, the USA, Italy and Switzerland.

Additional information/hobbies/interests/expertise:

- Professional: specialization in microbiology.
- Personal: Painting, dancing tropical music.
